

SUJAL RAMBHAD

Python Engineer · AI/ML Pipelines · Data Annotation Tooling · API Integration

Nagpur, Maharashtra, India | rambhadsujal16@gmail.com | +91-9372839399 | github.com/sujalrambhad

PROFESSIONAL SUMMARY

Python-focused AI Engineering student with hands-on experience designing end-to-end ML pipelines, REST API backends, and data-preprocessing workflows. Comfortable building production-grade Python systems with clean, well-tested code, and experienced integrating LLM APIs to power real-time applications. Seeking a contract role where I can contribute to AI data pipelines, annotation tooling, and model evaluation infrastructure — the exact stack Alignerr builds for frontier AI labs.

TECHNICAL SKILLS

Languages	Python (primary) · Java · C · C++
Python Ecosystem	PyTorch · TensorFlow · Hugging Face Transformers · scikit-learn · NumPy · Pandas
AI / ML	NLP · LLM Integration · Prompt Engineering · Model Evaluation · Supervised Learning
Backend / APIs	REST API Design & Integration · JSON · Error Handling · Edge-Case Management
Tooling / QA	Git & GitHub · Jupyter Notebook · Google Colab · VS Code · Linting (PEP 8)
Cloud / Infra	Microsoft Azure (AZ-900) · Android SDLC · Procedural Systems
CS Fundamentals	Data Structures & Algorithms · OOP · System Design

ENGINEERING PROJECTS

HireSense AI *Python · FastAPI · React/Vite · PostgreSQL · LLMs*

? Built an AI-powered job market analytics and resume intelligence platform combining job search, resume analysis and career guidance workflows.

? Implemented ATS-style resume scoring, AI resume review, job recommendations, skill-gap analysis, career assistant, resume builder and salary prediction features.

? Integrated PostgreSQL with a FastAPI backend and React/Vite frontend, plus semantic search using FAISS and Sentence Transformers.

SupportPilot AI *TypeScript · React · AI Support*

? Developed an AI-powered customer-support platform designed to help businesses manage customer conversations through an AI assistant.

? Built core workflows around business dashboards, document-based knowledge and AI chatbot interactions.

AI Debate Tool *Python · Streamlit · Google Gemini · Plotly*

? Built a multi-agent AI devil?s-advocate application that generates strong counter-arguments using multiple expert personas.

? Created an interactive Streamlit dashboard and integrated Google Gemini for model-powered debate generation and analysis.

AI SQL Query Builder *AI · SQL · Natural Language*

? Built an AI-assisted SQL query builder that turns a database schema and natural-language requirements into SQL queries.

? Designed the workflow to make database querying easier for users who may not want to write SQL manually.

INTERNSHIP EXPERIENCE

AI Virtual Internship — CodeSoft *Remote · AI Engineering Track · 2024*

• Delivered 3 AI mini-projects applying supervised learning and NLP techniques within structured engineering milestones — experience directly transferable to contract deliverable workflows.

• Performed ML model building, data preprocessing, and result evaluation; documented findings clearly to support async remote collaboration.

- Operated in a fully remote, async environment, demonstrating the communication discipline and self-management required for contract engineering roles.

EDUCATION

B.Tech – Artificial Intelligence Engineering *G.H. Rasoni College of Engineering (GHRCE), Nagpur | 2023 – 2027 | CGPA: 7.8 / 10*

Higher Secondary – CBSE Science *Bhavan's B.P. Vidya Mandir, Nagpur | 2023 | 82%*

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AZ-900) — Microsoft
- Java Programming Certification — IIT Madras
- Virtual AI Internship Certificate — CodeSoft
- Programming in Python — NPTEL
