

SUJAL RAMBHAD

AI Engineering Student | NLP & ML Developer | Python · PyTorch · Java · LLM Applications
Nagpur, Maharashtra, India | rambhadsujal16@gmail.com | +91-9372839399 | github.com/sujalrambhad

PROFESSIONAL SUMMARY

Third-year B.Tech Artificial Intelligence Engineering student specializing in NLP, large language model (LLM) applications, and AI-powered software development. Experienced in building end-to-end ML pipelines, prompt engineering, and deploying AI solutions using PyTorch and Python. Seeking an AI/ML internship to contribute research and engineering skills while gaining industry-level exposure.

EDUCATION

B.Tech – Artificial Intelligence Engineering 2023 – 2027

G.H. Rasoni College of Engineering (GHRCE), Nagpur | CGPA: 7.8 / 10

Higher Secondary – CBSE (Science) 2023

Bhavan's B.P. Vidya Mandir, Nagpur | 82%

AI & SOFTWARE PROJECTS

Text Summarization using NLP & LLM APIs 2024

Python · Hugging Face Transformers · Tokenization · REST API

- Built a transformer-based NLP pipeline that generates concise summaries from lengthy text inputs, achieving ~85% ROUGE-L score on CNN/DailyMail benchmark dataset.
- Implemented full text preprocessing pipeline including tokenization, stopword removal, and normalization to improve model input quality by 30%.
- Integrated a REST API interface enabling real-time summarization requests with <2s average response time.
- Explored prompt engineering strategies with GPT-style LLMs to compare extractive vs. abstractive output quality.

AI-Powered Roguelike Dungeon Generator 2024

Python · Procedural Content Generation · Algorithmic AI · Game Logic

- Designed and implemented a procedural AI system that generates dynamic dungeon maps with rooms, enemies, and reward layouts — producing 500+ unique dungeon configurations per run.
- Applied graph-based pathfinding algorithms (BFS/DFS) and randomized room-placement logic to ensure 100% traversable map generation.
- Optimized generation performance to under 150ms per dungeon instance through algorithmic refinements.

Event Information Mobile Application 2023

Java · Android · UI/UX Design · Mobile Development

- Developed a cross-platform mobile application for browsing and managing city events, supporting 50+ event listings with real-time filter and search functionality.
- Designed an intuitive UI reducing user navigation steps by 40% compared to initial prototype through iterative testing.

TECHNICAL SKILLS

Languages: Python, Java, C, C++

AI / ML: Machine Learning, NLP, LLM Integration, Prompt Engineering, Model Evaluation

Frameworks & Tools: PyTorch, TensorFlow, Hugging Face Transformers, scikit-learn, NumPy, Pandas

Development: REST API Integration, Git & GitHub, Android Development, SDLC

Cloud & Platforms: Microsoft Azure (AZ-501), Google Colab, Jupyter Notebook, VS Code

Concepts: Data Structures & Algorithms, OOP, Procedural Content Generation

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AZ-501) – Microsoft
- Java Programming Certification – IIT Madras
- Virtual AI Internship Certificate – CodeSoft
- NPTEL – Programming in Python (or relevant AI course)

INTERNSHIP EXPERIENCE

AI Virtual Internship – CodeSoft

2024

Remote · AI Engineering Track

- Completed structured AI project tasks involving ML model building, data preprocessing, and result evaluation.
- Delivered 3 AI mini-projects as part of the program, applying supervised learning and NLP techniques.

SOFT SKILLS

Problem Solving · Team Collaboration · Communication · Leadership · Time Management
